

Remarks

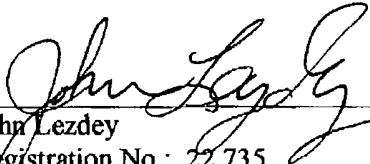

The correction to the Specification is also found in the Response to the Official Action of March 12, 2003.

The present application is an RCE. Claims 39-44 are in this case. The Examiner's objection under 35 USC 112 do not take into consideration the Amendment to the Specification which was filed in the Continuation-in-Part application which set forth the percentages and that the composition is free of persulfate salts.

The Preliminary Amendment was properly submitted at the time of filing a Continuation-in-Part application so as to make it officially of record. All of the limitations found in the claims are also of record in the Amended Specification.

Reconsideration and favorable action are earnestly solicited.

Respectfully submitted,
JOHN LEZDEY & ASSOCIATES
